3 - Tryptic soy agar (TSA)

Components	Concentration (g/L)
Pancreatic digest of casein	15
Papaic digest of soybean	5
NaCl	5
Agar	15

PROCEDURE:

Dissolve 40 g of Tryptic soy agar powder or the quantities of each component listed in the table in distilled H₂O, heat the mixture while stirring to fully dissolve all components and adjust the volume to 1L. Autoclave at 121 °C for 20 min.
